## Current Topics in Pediatric Emergencies

**October 9 & 10, 2017**

**Blanchard-Haendiges Auditorium**

**PIH Health Hospital Whittier**

**Registration: 7:30 - 8:00**

**Conference: 8:00- 4:30**

## Exploring Pediatric Emergencies

### Conference Overview:

*This comprehensive, evidence-based curriculum is designed for the emergency practitioner to enhance their knowledge and understanding of pediatric emergencies. The focus will be on epidemiology, pathophysiology, assessment, and interventions for various emergent conditions presented by leading practitioners. Upon completion the participant will be able to:*

- *Recognize emergent neonatal conditions.*
- *Discuss management of a laboring patient, emergent delivery and care of the newborn.*
- *Identify causes and current management of stridor and pediatric DKA.*
- *Describe assessment techniques and appropriate triage for children.*
- *List current trends in treatment of sepsis, hematuria and respiratory emergencies.*
- *Discuss disaster triage and toxic environmental exposure risks specific to children.*
- *Identify signs of child abuse and human trafficking.*
- *Learn techniques for insertion of pediatric tubes (IV, NG, catheter, suction, ET).*

### Speakers

#### Holly Birkinshaw, MSN

Clinical Nurse Specialist  
CHOC Children's Hospital

#### Charlene Contreras, REHS

Manager for Environmental Health  
LA County Public Health

#### Christine Cesa, MA

Advocate/Trainer
