

ULTRASOUND IN THE PEDIATRIC PATIENT IN THE E.D.

Manpreet Singh, MD, MBE, FACEP

Department of Emergency Medicine

Harbor UCLA Medical Center

1. State the utility of bladder ultrasound in children undergoing urethral catheterization.
2. Describe the procedure for use of ultrasound in obtaining a peripheral IV in children

Outline:

1. Ultrasound in obtaining Peripheral IV Access in Children
2. Bladder ultrasound: how much urine is enough for a successful catheterization
3. Using ultrasound in ROSC and Cardiac presentations
4. Soft tissue issues
5. Future implications for ultrasound
